

# EP-250 Lubricant

## Product Description

An extreme pressure lubricant designed for thick gauged, high temperature metal forming operations. This water-based lubricant replaces messy, thick oils. The EP and anti-wear additives reduce scoring and heat build-up. This product contains additives for corrosion protection and bacterial prevention.

## Typical Properties

Appearance ..... Creamy tan liquid  
Solubility ..... Emulsifiable with water  
pH..... 8.3 - 9.3  
Density ..... 8.3 lbs/gallon

## Application

Spray, brush, roll coat, or drip on the following substrates: hot rolled, cold rolled, aluminum and stainless steels.

## Use Directions

Metal Mates EP-250 is supplied ready to use, but can be diluted with water. Mixing Instructions: Slowly add water to lubricant while mixing.

## Safety and Handling

Avoid contact with eyes and prolonged contact with the skin. Wash thoroughly after handling. Minimum contact with this and all chemicals is a good policy to follow along with reading the Material Safety Data Sheet.

## Storage

Indoor storage preferred. First in first out stock rotation is recommended. If frozen, allow to thaw then mix thoroughly.

## Container Size

5 gallon pails, 55 gallon drums and 330 gallon totes.
